

Under the auspices of:

MENARINI RESEARCH: TODAY'S VALUES, TOMORROW'S CHALLENGES

*A conference organized to celebrate
the 125th anniversary of the Menarini Group*

Thursday, February 24, 2011
Florence, Palazzo Vecchio - Salone dei Cinquecento

The year 2011 marks the 125th anniversary of the founding of Menarini. Menarini began its research activities in 1978, building from scratch its scientific know-how (knowledge) and drug development abilities (the skills). Thanks to this dedication and commitment, in the 1990's it began registering its new drugs for the treatment of cardiovascular disease, infectious disease, and pain. Today Menarini has over 700 employees in Research and Development. Along this continuing journey, Menarini has welcomed many young Italian researchers who, unable to find career solutions in public research, would have otherwise contributed to the country's brain drain.

PROGRAM

From 3:30 to 6:00 p.m.

Chairmen

ENRICO GARACI

President of the Higher Institute of Health - Rome

GIANFRANCO GENSINI

Dean of the School of Medicine, University of Florence

Welcome

MATTEO RENZI

Mayor of the city of Florence

Company's Opening Address

Video "125 Years of Menarini"

CARLO ALBERTO MAGGI

Director of Research for the Menarini Group

Today's Values and Tomorrow's Challenges for Menarini Research

LOUIS J. IGNARRO

Nobel Prize Laureate in Medicine and Physiology

Professor of Molecular and Medical Pharmacology

U.C.L.A., Los Angeles, California, U.S.A.

Nitric Oxide: The Road to Stockholm

JONATHAN S. BEREK

Professor and Chair, Obstetrics and Gynaecology

Stanford Women's Cancer Center, Stanford University School of Medicine,

Stanford, California, U.S.A.

Abagovomab, the Immunotherapy for Ovarian Cancer:

Can We Increase Survival?
